SPIN COLUMN-BASED DNA EXTRACTION KIT (TEACHING PURPOSE ONLY)

Product Overview

Our Spin Column-Based DNA Extraction Kit is designed to provide a rapid, simple, and efficient method for isolating high-quality DNA from a variety of biological samples, including blood, tissues, cells, saliva, and plant material. This kit utilizes a convenient spin-column format to ensure high yields and purity for downstream applications such as PCR and genomic analysis.

Key Features

- ▶ **Fast & Simple Protocol:** Complete the DNA extraction in as little as 40 minutes
- ▶ **High Purity & Yield:** Obtain high-quality genomic DNA suitable for a wide range of applications.
- ▶ **Versatile:** Compatible with a variety of sample types, including cultured cells and CSF.
- ▶ **Convenient Spin Column Format:** Simple, no-centrifuge transfer system with high-efficiency recovery.

Kit Contents

- ▶ **Spin Columns** – Pre-filled with silica-based membrane for efficient DNA binding.
- ▶ **Binding Buffer** – Ensures optimal DNA binding to the column membrane.
- ▶ **Wash Buffers 1 & 2** – Removes contaminants and ensures DNA purity.
- ▶ **Elution Buffer** – For the final DNA elution in a small volume.

PROTOCOL MANUAL

Step-by-step instructions for easy use.

Application Areas

▶ Compatible for high grade molecular assays viz, End point PCR & qPCR, Next generation Sequencing, Cloning and Expression Studies

Storage Conditions

▶ Store the kit at 4-8°C
Protect reagents from extreme temperatures.

Shelf life

▶ 12 months from the date of manufacture.

Size Options

▶ 10 reactions, 20 reactions, 30 reactions, 40 reactions and 50 reactions
